

Towards Low Carbon Cities: Experience Sharing Workshop

February 11-12, 2013
Asia Airport Hotel, Thailand

The Asian Institute of Technology (AIT), Thailand, initiated “Action towards Resource-efficient and Low Carbon Cities in Asia” program (<http://lcc.ait.asia>) with support from the French Environment and Energy Management Agency (ADEME) to assist ten small and medium cities in Asia in their efforts towards low carbon society, through the use of improved and efficient resources leading to environmental sustainability. As part of the activities, AIT is organizing two days an **Experience Sharing Workshop on Low Carbon initiatives of Cities** in cooperation with ADEME and SDCC/AIT-France Network during February 11-12, 2013 at Asia Airport Hotel, Thailand. This will be the final activity of the project to give a reflection on the work done and what needs to be done and how that could be done in the future.

Objectives

This workshop aims to:

- a. Share the knowledge towards low carbon society through improved resource efficiency and promoting environmental sustainability
- b. Exchange of information and experiences regarding climate change issues in European and Asian cities
- c. Expect for future collaboration and partnership between cities toward low carbon growth

Who should attend?

The workshop will be useful to city authorities or other stakeholders (research/university/NGOs) who are working on city planning and policy level, and have an interest to implement activities to mitigate climate change at the city level.
