

Green Infrastructure & Buildings:

Ensuring Sustainability of Small and Medium Scale Cities

Prevention is better than cure

Small and Medium Scale cities in developing countries follow the same unsustainable urban development pattern of big cities. Although many of them are not major resource users and polluters today, proactive measures are needed to guide their urban development towards sustainability in future. As backbones of urban development, green infrastructure and buildings can contribute immensely to achieve sustainability of small and medium cities. They will;

- Enable ecologically-friendly urban development
- Ensure "Low-Carbon Societies".

Green Agenda Towards Low-Carbon Society

	Environmentally Sustainable Transport
	Integrated Waste Management
	Resource Efficient Buildings

Date : 22nd June, 2011
Time : 3:50-5:20 PM
Venue : Room A, UNCC, Bangkok

Convener
 **AIT**
 Asian Institute of Technology
